

## **Sensing a Future**

In this shaky world  
where up and down  
are definitely known  
but gravitation still  
poses big perplexities  
we'd sometimes like  
to shake off atoms  
and take a guided  
tour of the possible  
and if such a ride  
were available for  
a dollar or a million  
we'd buy a ticket  
but since no booth  
sells these tickets  
we continue with  
our work yet vaguely  
sense this ride is  
going to happen  
sometime because  
we see clearings and  
glimpses especially  
when mind and air  
are perfectly quiet  
and love is flowing  
up and down and  
all through our being  
as if red lights were at  
some railroad crossing  
flashing to announce  
an unseen movement  
much grander than  
anything stoppable
